**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

The status of the claims is as follows:

Claims 1-9 have been cancelled; and

Claims 10-25 are herein addressed below.

Claims 16 and 24 are objected to because it appears that the opening widens in the horizontal direction and not the vertical direction. Clarification is requested.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Great Britain patent to Aihara et al. Great Britain patent to Aihara et al. disclose a guiding system (16) for a sliding door (10) of a motor vehicle comprising a runner rail (18) having a first second and a curved section (best seen in Figure 2) with the rail having a V-shaped section and a trough along a bottom section wherein the rail substantially covers the guiding system, a roller assembly having three aligned rollers (24, and 26) guided along the track (18), and a spring element (36) rotatably engaging the rollers (24 and 26) which engage the track [see figures 5 and 14 for the rotational movement of the rollers]. Note: all of the rollers pivot about their respective axis.

Claims 10-17, and 19-25 are allowable.

The applicant's arguments have been considered but are not deemed persuasive. An attempt was made to cancel claim 18 and allow the application, but an agreement could not be reached. The additional phraseology of claim 18 fails to limit the claim in that all rollers which are mounted on an pivot axis rotates about the axis. Furthermore, Great Britain patent to Aihara et al. disclose a pivotal roller assembly where the rollers rotate about their own axis and the entire roller assembly is rotated about a second axis as discussed in detail above. Still furthermore, the spring of Great Britain patent to Aihara et al. "loads" the rollers in that the spring forces the roller in one direction and in that direction, the door is loaded on the support of the rollers.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-TH from 8 to 6.
